

## *Our future poem*

There aren't any trees,  
there will be only rubbish in the sea,  
and there aren't any fish,  
is that the life we wish?  
People should not be lying  
that the sea will be dying.  
Everywhere is plastic,  
the world is not fantastic.

If we won't use too much plastic,  
the world could be fantastic.  
If the people will be lazy,  
the world will turn crazy.  
There won't be a school,  
so the future will be cool.  
Some robots and some cars  
and we will fly to the Mars.

There won't be any trees  
but many factories,  
I think the future won't be so cool,  
but surprising, too.  
Help our planet and use your talent.

All animals will have food,  
it's healthy too.  
Everyone will go to school  
and have a long life, too.  
We will have work forever and get  
new trees in the wood –  
our future will be good.

We must help the nature, otherwise  
our animals will be in danger.  
We must not chop all the wood,  
then the future will be good.  
The future will be good,  
nobody will be poor, that's for sure.

Nowhere will be fights  
and in our hearts will be more lights.

I think the future will be fine,  
in school and streets there won't be  
any crime.

The people will be friendly together,  
they will save the animals and earth  
forever.

Everybody will go to school,  
so we will more schools, that true.  
Perhaps in some schools there will be  
a pool, or a climbing wall, too.

There will be many electric cars,  
so no accidents and scars.  
The people will be healthier  
and also wealthier.  
The future is a bright new place,  
I will travel out in space.  
Robots will help us every day and  
we will all love and shout "hurray!"

The future will be cool,  
we will have a big school.  
We will have robot tools  
and all children will have food.  
The future will be good,  
the people all have food.  
The pupils will get old  
and nobody has a cold.

The future will be cool,  
everybody can go to school.  
Maybe there will be too much  
plastic, but all the other things will be  
fantastic.  
All people will have food,  
all children go to school.  
The environment will be good again,  
AMEN.
